Armoury II interface enables intuitive adjustment of joystick, button, performance or light settings

OPTIMIZED TRI-MODE CONNECTIVITY

Connect ROG Chakram any way you desire, with dual-wireless 2.4GHz and Bluetooth LE, plus wired USB connectivity all on tap. Bond instantly via the included 1ms 2.4GHz USB dongle, maximize battery life with Bluetooth LE or attach anytime with a cable – the choice is yours.

ULTRA PERFORMANCE

ROG Chakram is equipped with a high-end optical gaming sensor to deliver the accuracy and speed you need. Its 100 to 16,000 dpi sensor tracks movements flawlessly up to an outstanding speed of 400 inches per second (IPS) at up to 40 g acceleration. You'll also enjoy lag-free responsiveness with a 1,000 Hz polling rate in both 2.4GHz and wired mode for ultrasmooth gaming experiences.

EASY DIY

ROG Chakram is loaded with easy DIY features, from its screw-less magnetic buttons and cover to exclusive push-fit switch sockets and customizable badge, providing loads of freedom to make Chakram your own.

Analog Mode

When you set ROG Chakram's joystick to Analog Mode it simulates a real analog stick or joypad thumb stick, making it ideal for flight sims and racing game, empowering you to climb, dive, drift, pan the view – or any analog control.

Digital Mode

For first-person-shooter (FPS) or battle-royale arena commands, ROG Chakram's joystick can go digital, providing four programmable directions. Just push to reload, switch weapons, tilt, talk, summon a map, scroll web pages or practically any action imaginable – in games or beyond.

Customizable Joystick

We've included both a long and a short joystick to match different hand shapes and play styles. For times when the stick isn't needed, then whip it off and fit the included socket covers for a flush finish.
