The benefit of sunglasses:

ultraviolet rays can damage the cornea and retina, and sunglasses can eliminate uv radiation when the eye receives too much light it naturally shrinks the iris once the iris shrinks to its limit then people need to squint

if the light is still too much such as the sunlight reflected from the snow it will damage the retina sunglasses can reduce the regulation burden of the ciliary muscle of the glasses in the bright light

GRFISIA

100% polarized lens, filtering harmful rays, balancing the colors that our eyes naturally perceived. Bring you better clarity of a natural vision.
