

Metronic 8 inch Impulse Bag Sealer Poly Bag Heat Sealer Sealing Machine Heat Seal Closer with Repair Kit Review-2021

[Read Customer Reviews](#)

TABLETOP IMPULSE HEAT SEALER - *Important Notice: The light only turns on and the sealer is activated when the handle is pressed down!* The Metronic tabletop impulse sealer, quickly seals different types of plastic packaging. The impulse heat sealer melts one layer of plastic to another, creating a strong permanent seal that can only be broken by cutting or ripping it open. Make sealing poly bags a quick and easy process! Set includes 2 replacement heating elements and fuse.

SAFE AND EASY TO USE - Metronic impulse sealers are safe and easy to use. The heating element in the impulse sealer is not constantly heated. Once pressure is applied to the sealing arm, the heat sealer quickly seals the material and creates a seal. The light will turn on when the sealer is activated, and will turn off once sealing is completed. Use the appropriate heat setting for your material. Heat sealed bags make sure that your products are airtight, water resistant, and tamper-proof.

NO WARMUP TIME NEEDED - No warmup or cooldown time needed, safe and simple to use. Impulse sealers are very convenient and safe because they can be immediately used, and the chance of being burned is minimal. An impulse sealer can save your business time and money. The impulse sealer will only apply heat whenever the arm is down and in contact with the material and base. This means a safer work environment and the ability to seal packages quickly for shipping or storage.

ADJUSTABLE TIMER SETTING - Adjustable heat settings for the different materials being used. For most applications, using the impulse heat sealer at heat setting of 3 is sufficient. However, different temperature settings will be more suitable for certain materials of a higher or lower melting point or thickness. The adjustable timer makes it easy to seal a variety of packaging.

QUALITY AND SATISFACTION GUARANTEE - At Jiara International, we are deeply committed to providing a superior shopping experience to our customers. Every product comes with a 100% satisfaction guarantee. If for any reason you are not completely satisfied with your purchase, you may return for a refund or exchange. 8 inch Impulse Bag Sealer NOTE

Level 3 is enough for most applications. The red light is not predictable when plug into the power. It is only predictable when keep the handle pressed down on bottom. This is a protection for sealer or it will burn out after several uses. When seal is done, the red light will go off. Keep the handle pressed down for a few seconds to get optimal results. Keep the sealer's surface clean to avoid the oxidation of the residue which will reduce the life of the heat sealing strip. Do not use wet cloth to clean the surface of heat sealing strip.

Specification:

- 8 inch
