

**Neosmuk Magnetic Hooks, 22 lb+ Cruise Essentials Hook with CNC Machined Base, Strong Corrosion Protection Ideal for Grill, Towel, Kitchen Indoor Hanging (Silvery White, Pack of 10)  
Review-2021**

[Read Customer Reviews](#)

**SUPER DURABLE L** - Amazing strong, sturdy and reliable hook with a 1.32 inches wide and 2 inches long, it can hold many goods on a thick wild steel.

**RELIABLE COATING**-We offer 3 layers' coating of 'Nickel+Nickel+Copper' on the steel base and hook. It features an excellent wash ability that substantially reduce residual dust and foreign objects, it achieves low cost and high functionality. It provides significantly high moisture resistance, salt water resistance and electric insulation. It also exhibits outstanding thermal resistance. Maintenance free, no rust!

**HIGH QUALITY** "Routine dimensional/visual checking were performed in the CNC Machines flow line, defective pieces such as surface flaw, crack or oversized products were checked and picked out at the first place. Dimensions, flux and surface of sold products was sampling checked and sorted in our factory. We guarantee every product was made under ISO 9001 Quality Systems!

**VERSATILE USE**- After a precise simulation and calculation, this hook was endowed with a strong capability for holding of various items in your bathroom,kitchen,living room, indoor,outdoor and workshop wherever there are iron or steel.

**100% "NO BREAK" MONEY-BACK GUARANTEE** - If you are not happy with your purchase, you can return them for a full refund or replacement. We stand behind the quality of our product and are confident you will LOVE this hook. Click "Add To Cart" now.Our products

The Neosmuk(NS) magnetic hook consists mainly of neodymium(a rare-earth element), iron and boron, and take full advantage of Neomsuk's state-of-the-art magnetic powder metallurgy technologies. So far, a maximum energy product of 414KJ/m<sup>3</sup>(52MGOe) has been attained.

Reduce light rare earth material and avoid using heavy rare earth elements with a high risk of uneven distribution or market fluctuations, such as Tb(terbium),Dy(dysprosium), and pioneer a new magnetic property range equivalent to or better than those of the world's highest level high-power materials that have been achieved so far-this is an essential initiative for establishing a sustainable and stable supply system for low cost high power magnet.

Our neodymium magnet achieved the world's highest levels of residual magnetic flux density Br, intrinsic coercive force Hcj and (BH)max. A wide variety of magnetic characteristics provides a choice of most suitable type, enabling drastic down-sizing, slimming, and increased power of magnet applied devices.

As a manufacturer providing abundant know-how on magnetic circuit designs as well as high-quality, high performance magnets, we positively support the acceleration and optimization of product designs using magnets

Tools & home improvement:

Note:

Straight upside down hanging of magnetic hooks is recommended, though hanging method of sideways is used in the most common place.Capacity of sideways hanging of magnet hook is determined by the friction of the attracted item, it is much smaller than Straight upside down hanging of hooks.

Whether magnetic hooks can hold 0lb, few pounds,many pounds, your steel is decisive!

1,A thicker Steel

Thin steel means saturation of flux in the circuit. Excess flux is wasted in the air and can't be utilized.

2.Thinner painting/no spacer

Thick painting will give rise to a great leakage of flux,only a small portion of flux from steel base can be utilized to provide the attractive force.The thicker the painting, the worse the holding force!

3.Warning

Please be reasonable when sticking the cruise hooks to a thin steel with thick and smooth painting at sideways, like Refrigerator,Filing cabinet...etc,because most flux is wasted in air !

Warning & Precautions

2. In the normal conditions, this magnet is too large to swallow. But you have to be careful for racked/separated pieces. If cracked/separated pieces are swallowed, consult a doctor immediately. Keep the product out of children.

3. Keep magnets always from magnetic recording media such as floppy disks, magnetic digital cards, magnetic tapes, prepaid card. If it is placed near to a magnetic recording medium, recorded
