

Pretext Balloon Pump Electric Air Blower Dual Nozzle Portable Balloon Inflator for Fast and Easy Bulk Balloons Filling for Event and Party Decoration (Blue, 110V) Review-2021

[Read Customer Reviews](#)

Super Timesaver - Easily inflate your balloons in bulk with this premium quality easy-to-use air blower for balloons

Dual Nozzles with 2 Inflation Modes - 1 ON-OFF automatic nozzle for continuous balloon filling and 1 nozzle with a push-to-inflate manual mode. Both nozzles can be used at the same time to boost productivity

Lightweight and Portable - This balloon air pump features a portable size and design with an easy-grip handle so you can take it to your party location for on-site balloon filling

Comes with 2 extra narrow-tip extension tubes so you can also inflate water balloons or regular balloons with small openings

Product Compliance and Safety - This product features a 110-120V UL-Listed plug and was tested to be safe for a smooth and safe balloon-blowing experience (Frequency: 60Hz, Power: 600W)

SUPER TIME-SAVER: Easily inflate your balloons in bulk with this premium quality easy-to-use air blower for balloons

Lightweight and Portable: This balloon air pump features a portable size and design with an easy-grip handle so you can take it to your party location for on-site balloon filling
IDEAL USE: Say goodbye to filling balloons by mouth or with a hand-pump! Save your energy for better things and use this practically designed portable electrical air pump to fill up bulk balloons quick and easy.

Dual Nozzles with 2 Inflation Modes:

1 ON-OFF automatic nozzle for continuous balloon filling, and 1 nozzle with a push-to-inflate manual mode.

Both nozzles can be used at the same time to boost productivity

Essential for Any Party or Event Planner:

Use for 'regular party balloons' of all sizes and shapes so your party or event takes a festive look in a matter of minutes instead of hours...

DO NOT USE to inflate pools, swim rings, airbeds, inflatable boats or 260Q/350Q balloons.

Super Time-Saver:

With a rate of 2-3 seconds per balloon, and 2 nozzles which can work simultaneously, this pump can easily inflate 40-60 balloons per minute.

This is not a helium or hydrogen pump, fills with regular air only.

Pump Specifications:

Input Voltage: 110-120V

Power: 600W, 60Hz. Freq.

Size: 8 x 5 x 6.25 Inches

Weight: 2 lbs (0.94 kgs)

Inflation Rate: 2-3 seconds per balloon

Product Compliance and Safety:

This product features a 110-120V ETL-Certified plug and was tested to be safe for a smooth and safe balloon-blowing experience.

This affordable, yet powerful pump will make a noise while in operation. Do not exceed 2 hours of continuous operation.

How To Use:

Pinch the 2 sides of the balloon mouth with your fingers
Put the balloon opening onto the inflation port
Push down the inflation port
Once reached the desired size, remove the balloon and tie it.

TIP: Make sure you have a grip on the balloon before pushing down the port, so you're not losing the balloon to the air power... (even more important in Auto-Mode where the air pumps continuously).

Productivity Tip:

Set up an Assembly Line, where 1 person fills up the balloons and immediately hands it over to another person for tying them.

Boost productivity even further, by using both modes simultaneously, and have 2 fellows available nearby for tying them.
