**Fluffing Instructions**

Please allow 48-72 hours to the pillows to fully expand. You can also tap or press the pillows a few times to fasten this process.

If your pillows still do not expand, please use the following methods to spring them up:

1. Put the Pillows in the Dryer with 2 Tennis Balls:

Start off by placing your pillows in a dryer with 2 tennis balls (preferably wrapped in a cloth or socks separately). The tennis balls will hit the pillows, fluffing up the filling. Tumble dry on low for an hour to make sure your pillows becomes fluffier and softer.

2. Leave the Pillows in the Sun:

Leaving the pillows in the sun for a few hours on a bright day will evaporate the moisture that builds up over nights of use and the pillows will fluff up over the course of the day. You can also hang the pillows outside on a clothes line.

**Care Instructions**

**Spot Clean:**

It is recommended to use a cloth or sponge to wipe off any stains or dirt using a mild detergent mixed with cold water.

**Drying:**

After spin drying the pillows in the machine, take them out carefully. Shake or punch them to dislodge any clumps inside.

The pillows could be air dried. However, make sure they are left in a warm area to completely dry.

If you are using a machine to dry, make sure you use a drying bag or wrap the pillows in a towel.

Also, set the dryer machine on sensitive or fluff setting without heat.
